PISA TRACKING

Foreign Teacher Manual

For subject teachers and form teachers who use PISA Tracking in English: scores, Cases and PAs, conduct, class profile.

Edition 16/10/2026 · screenshots from the app (demo data)

Remember three things

1. Open **Tasks** every morning: overdue items are on top; click a row to do it right there.

2. Mark the test week by **Wednesday** of the next week; every MT score needs a **comment**. Absent: type **-**.

3. It is done only when you see "✓ Saved". Clicked by mistake: **Undo** on the message.

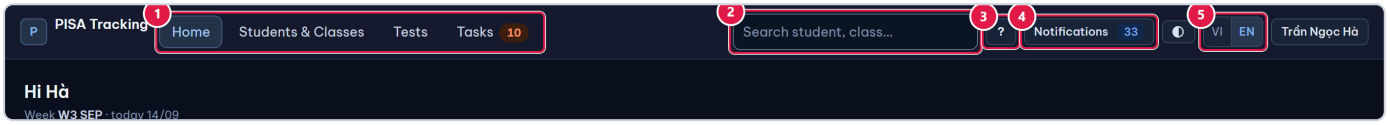

In this manual

1. Top bar
2. 5 weekly tasks
3. Screen by screen
4. Rules and deadlines
5. Who can do what
6. FAQ
7. Glossary
8. Appendix · Many at once

> **DATES ON SCREEN**
> The app shows weeks as a **week code**: **W2 OCT** = 2nd week of October (Monday → Sunday; a week belongs to the month of its Thursday). Exact dates are used only for deadlines, exam dates, birthdays and logs.

Switch language with **VI** | **EN** in the top bar (phone: account menu); the app remembers it for your account. Data typed by other people (names, comments) stays in the language it was written in.

Top bar

Top bar (computer)

1. Four areas: Home · Students & Classes · Tests · Tasks (red number = overdue).
2. Search a student or class (2+ letters, e.g. "ft101").
3. Guide for the current screen.
4. Notifications: To do / FYI.
5. Language VI | EN — saved to your account.
6. Account: My profile, sign out.

On a phone the four areas are in the bottom bar; search, **?**, bell and account are at the top.

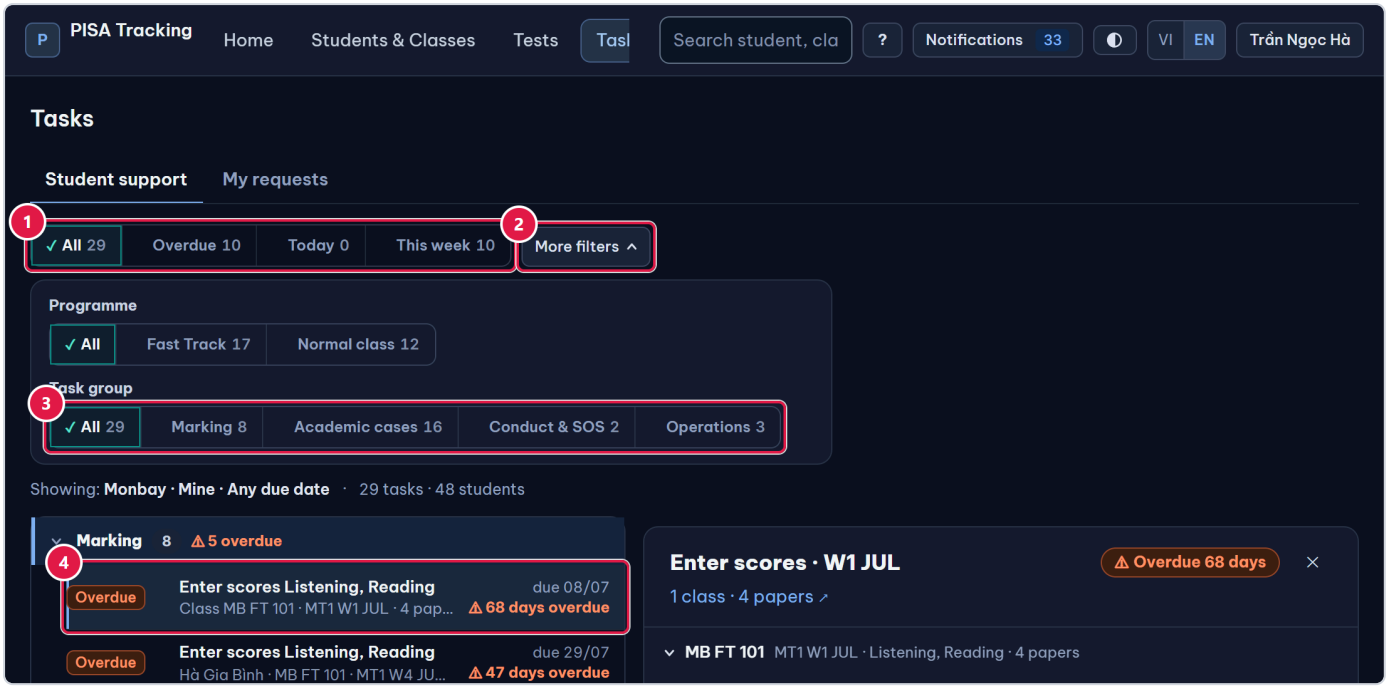

5 weekly tasks

Each task lists: who · deadline · where · steps · when it is done · how to fix a mistake · when it is blocked · common mistakes.

1. Open Tasks every morning

WHO Every teacher DEADLINE Every day

WHERE **Tasks** › **Student support** (Home also has a "Today" block)

1. Deadline filter: All · Overdue · Today · This week.
2. **More filters**: programme, task group.
3. Task groups: Marking · Academic cases · Conduct & SOS · Operations.
4. One row = one task; status on the left, deadline on the right.

1. Click **Tasks**. **Overdue** tasks are on top with ⚠ and the number of days.
2. Click a row: what you need to fill in opens on the right — you stay on the page. A grouped row ("n students") opens a list.
3. Click **Save**: the row shows "✓ Saved · … · Undo" and moves on; in a panel use **Next task ›**.
4. To see one group only: **More filters** › task group.

WHEN IT IS DONE

The task leaves the list; the red number next to **Tasks** and the overdue count on Home go down at once — every screen counts the same way.

FIX A MISTAKE

Saved by mistake: **Undo** on the row (about 10 seconds). Later: open the same place (Case, score grid) and change it.

WHEN IT IS BLOCKED

Other people's tasks are read-only. Requests waiting for the Head are under **My requests**, not in the task list.

Common mistakes	Fix

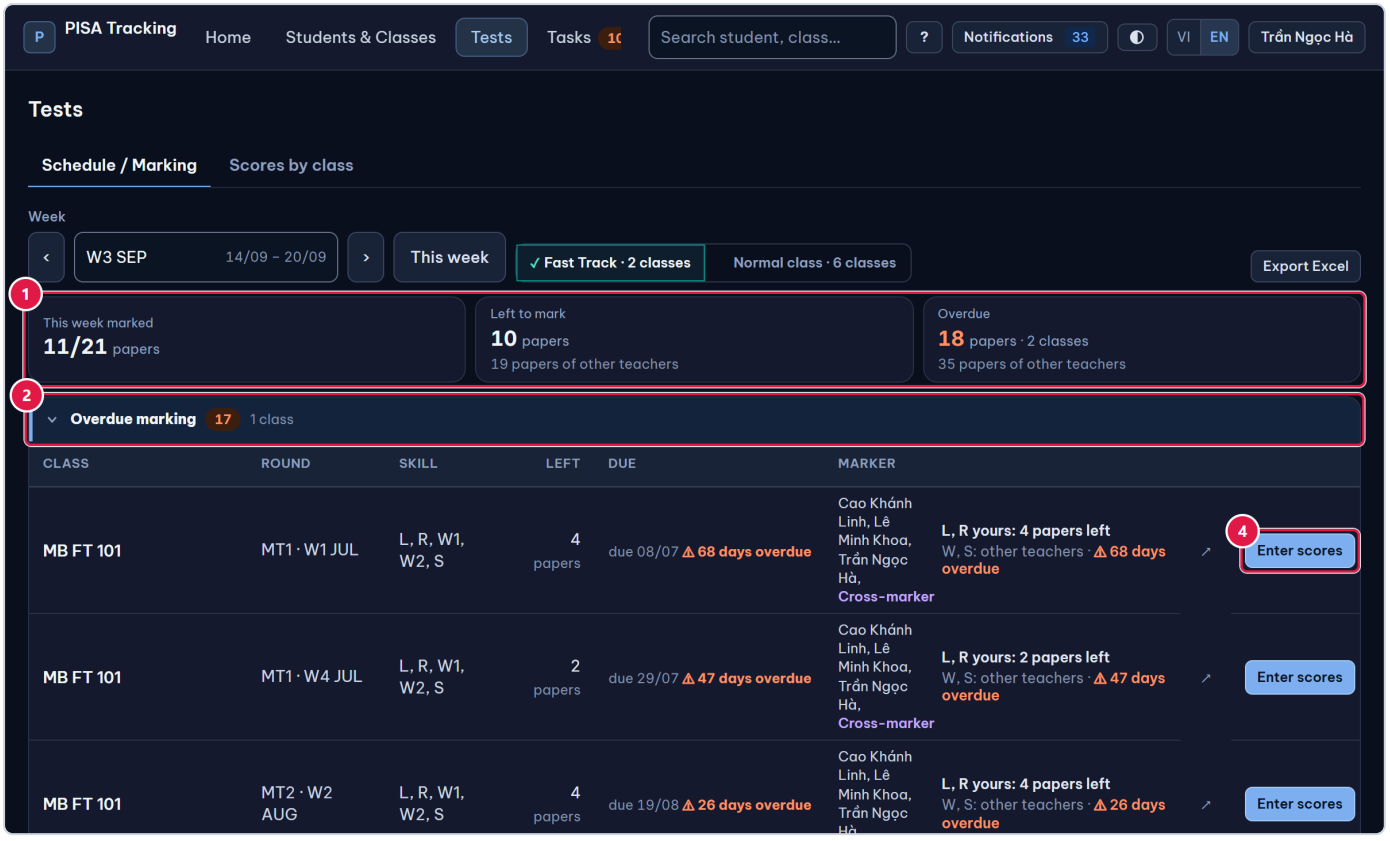

Task still overdue after entering scores	A score is missing its comment or cause group — open the grid and look for "missing comment".
Cannot find my class's task	Clear the filters: **All** and check **More filters**.

2. Enter Mock Test scores + Speaking cross-marking

WHO The teacher assigned to that skill; Speaking teachers cross-mark other classes in the same branch

DEADLINE **Wednesday** after the test week (cross-marking is never overdue)

WHERE **Tests** › **Schedule / Marking**, or an "Enter scores" row in **Tasks**

1. Your marking progress: marked · still to mark · overdue.
2. **Overdue marking**: past the deadline, with the teachers still missing.
3. **Marking this week**: last week's tests, due Wednesday.
4. **Enter scores** opens the grid right below.

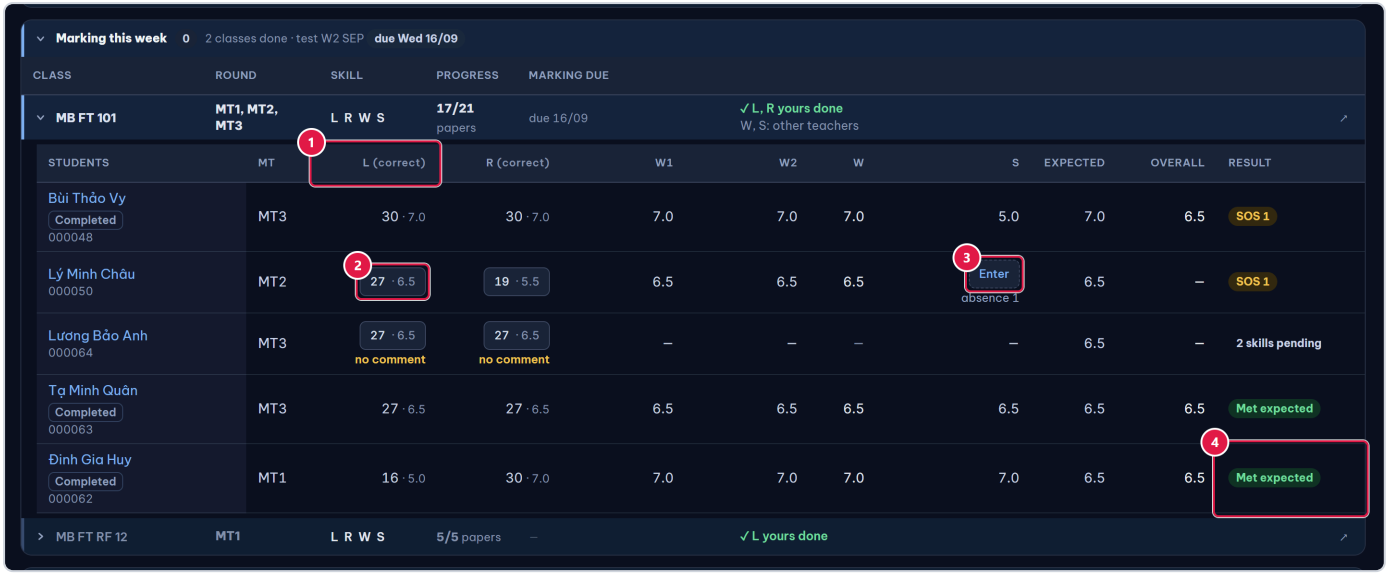

1. Open **Tests**: **Marking this week** is last week's test.
2. Click the class row (or **Enter scores**): the grid opens below. Click a cell, type the score and a **comment**; below expectation also pick **cause groups**.
3. Absent: type **-**. Remove the absence: delete the "-".
4. Speaking cross-marking: **Tasks** › **Marking**, the **Speaking cross-marking** row, grouped by test week → class.

> **WHEN IT IS DONE**
> The cell shows the score (L/R: "27 · 6.5"); the class row says your skills are done. With all four skills the Result column shows met expectation or SOS. The task leaves Tasks.

> **FIX A MISTAKE**
> Before the round is complete: click the cell, change it, add a reason (optional); clearing a cell deletes the score. After it is complete: empty cells can still be entered; to change an existing score, ask the Head.

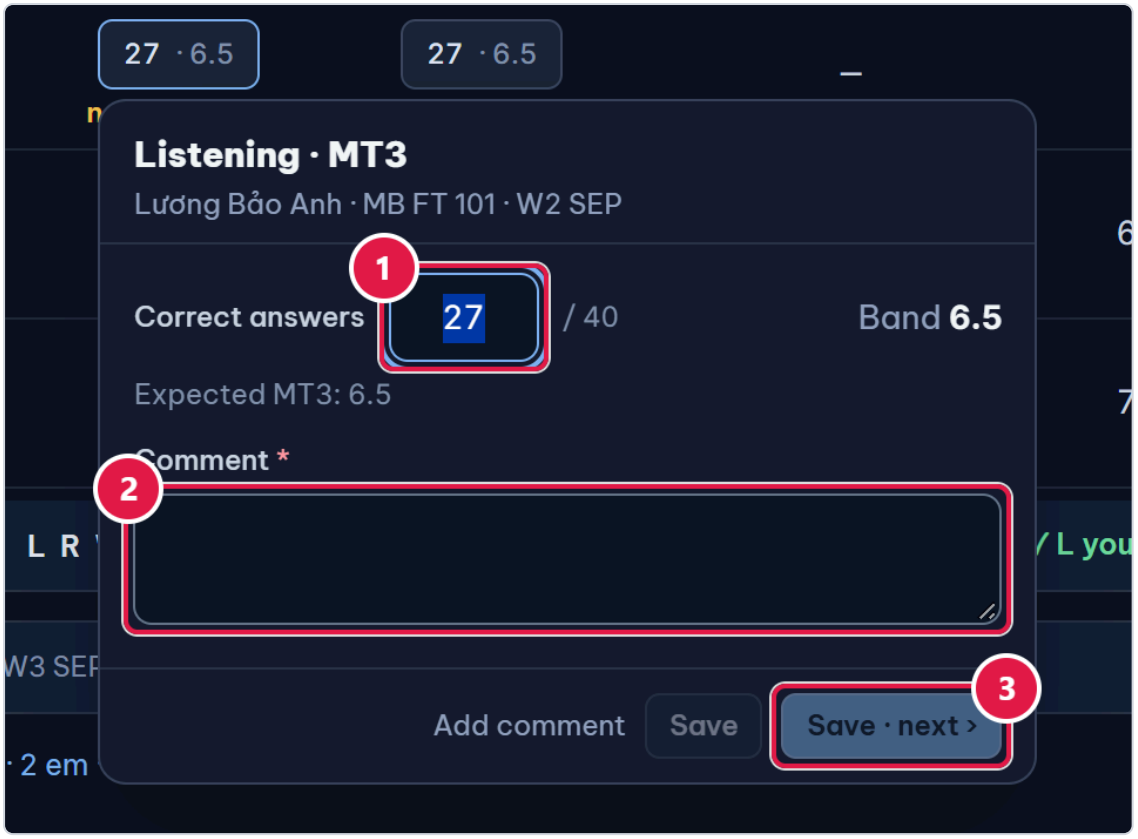

WHEN IT IS BLOCKED
Locked "test week not reached yet". Not your skill: "You can only enter scores for your assigned skill."
Round complete: ask the Head to change an existing score.

Common mistakes	Fix
Typed 6,5 in an L / R cell	Use a dot: 6.5 (or type correct answers).
Cannot save: comment missing	Write 10+ characters; below expectation, pick a cause group.
Pasted a column from Excel	The grid takes one cell at a time (appendix C).

Fast Track grid inside the schedule

1. L, R show correct answers; the band is worked out.
2. Click a cell to enter / change it.
3. Empty cell; "absent 1st time" after a "-".
4. Result: met expectation / SOS 1–3.

One score box

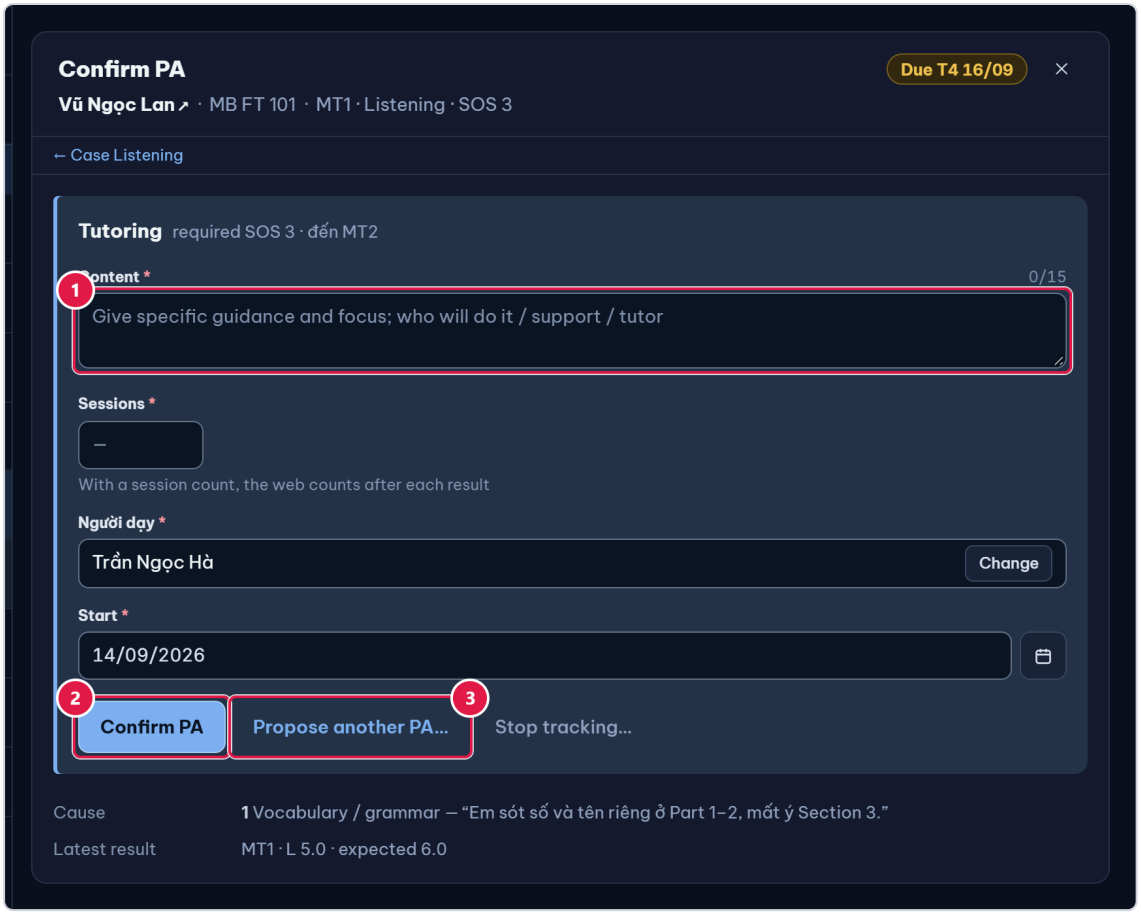

1. Correct answers (L, R) or four criteria (W, S).
2. Comment — required for a score (10+ characters).
3. **Save · next ›** goes to the next student.

3. Confirm a Case / PA

WHO The subject teacher of that skill (the Head can do it)

DEADLINE **5 days** from the day the round is closed, counting the first day; SOS 3 / Urgent: **3 days**

WHERE **Tasks** › **Academic cases**, a "Confirm PA · skill · student" row

1. PA content: guidance, focus, who does it.
2. **Confirm PA** — the PA starts.
3. **Propose another PA...** to do it differently (the Head approves).

1. A student is below expectation in an MT. Round not closed yet: the Case is **provisional** — no deadline, no task. Round closed: Case + PA by the rules.
2. Click the "Confirm PA" row: write the content, check the teacher and start date, then **Confirm PA**.
3. Several students, same class, same test week, same SOS level: grouped row → **Confirm PAs together** (appendix A).
4. Different plan: **Propose another PA...** → **Send to manager**. No need to track: **Stop tracking...**.

> **WHEN IT IS DONE**
> The PA is running. The first PA result task appears after 2 weeks.

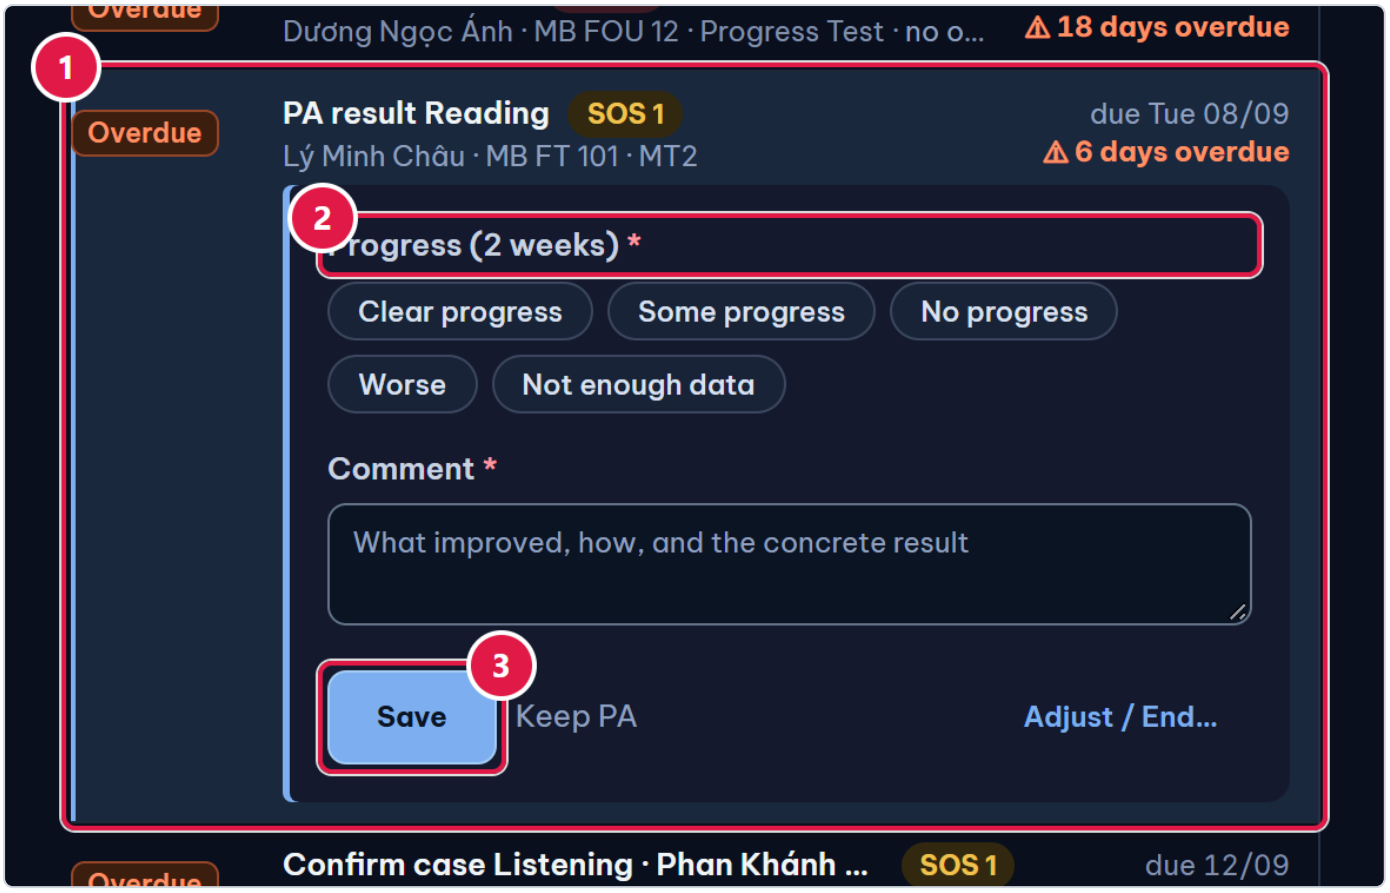

> **FIX A MISTAKE**
> Change the PA in the Case. Request sent by mistake: **My requests** › withdraw. Declined: read the reason, **Edit and resend**.

> **WHEN IT IS BLOCKED**
> "Confirm the Case first, then the PA." A closed Case cannot be confirmed. If the Overall meets expectation before you confirm, the Case is removed (nothing to do).

Common mistakes	Fix
Content too short	15+ characters: what, when, who helps.
A provisional Case has no button	The round is not closed yet — wait.

4. Record a PA result

WHO The teacher on the PA DEADLINE Every **2 weeks**; due **Tuesday** after the period
WHERE **Tasks**, a "PA result · skill" row (or the Case on the student profile)

1 The PA result row: click to open the form on the row. 2 **Progress (2 weeks)**.
3 **Save** — the PA continues; Undo for 10 seconds.

1. Click the row. PAs without sessions: choose **Progress (2 weeks)**, write a comment, **Save** — right on the row.
2. Tutor, PAs with sessions, the last result, free support: a panel opens for the full form.
3. To change the PA: **Adjust...**.
4. Skill met in the next MT / end date: a "Final result" task, button **Final result**, then close the Case.

WHEN IT IS DONE
The row shows "✓ Saved · ... · Undo". The next task appears in 2 weeks.

FIX A MISTAKE
Undo right after saving. To write before the period ends: in the Case use **Update early**.

WHEN IT IS BLOCKED
Ending a rule-based PA early needs **End PA** with a 10+ character reason (form teacher / Head). Student paused: all deadlines stop.

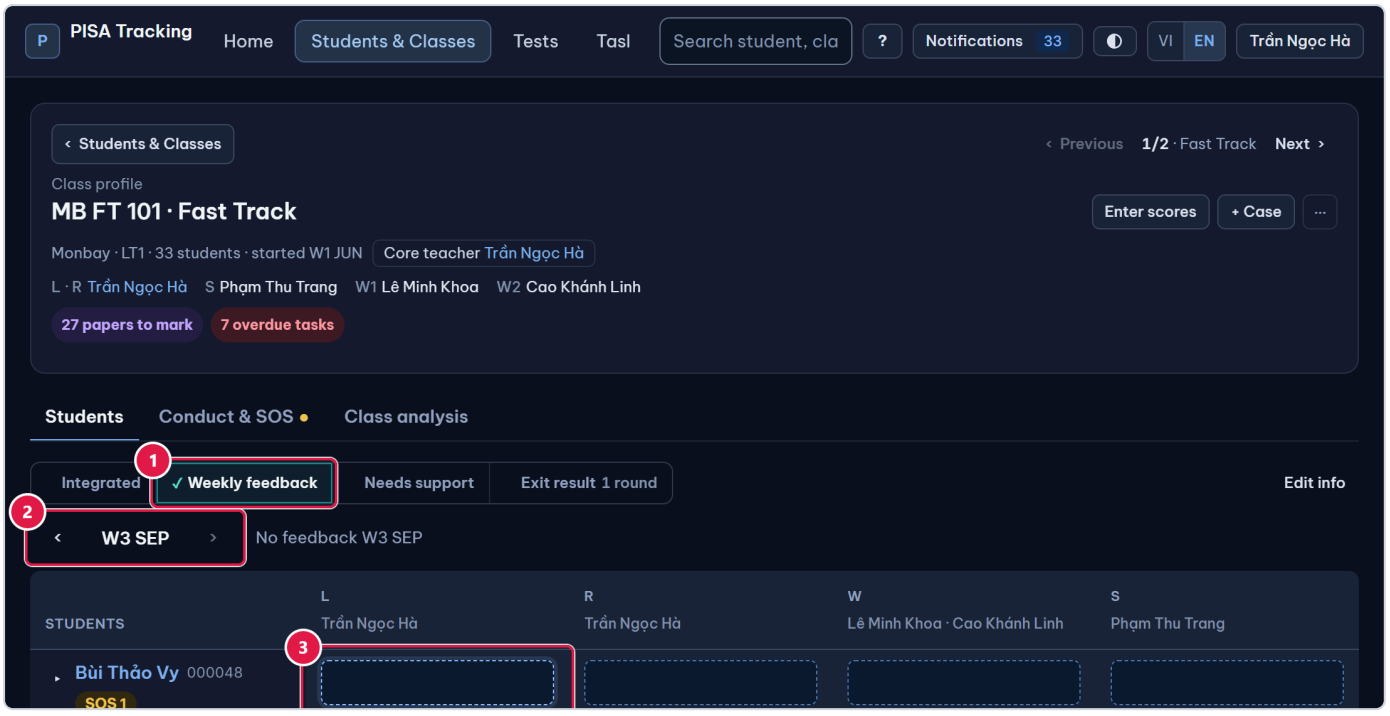

Common mistakes	Fix
Forgot the last result	A "Final result" task is overdue in Tasks — do it now.

5. Log incidents + weekly feedback

WHO Incidents: any teacher of the class (the form teacher handles them). Feedback: each teacher for their own skill

DEADLINE Handling an incident: **5 days**; feedback every week

WHERE Class profile › ··· on a student row › **+ Log incident**; feedback: class profile › **Students** › View **Weekly feedback**

1. View **Weekly feedback**.
2. Pick the week ‹ ›.
3. One cell = one student × one skill: type, leave the cell to save.

1. Incident: on the student row click ··· › **+ Log incident**: date, group, incident (3–60 characters), evidence if any, **Save**.
2. Same incident for several students: **Conduct & SOS** tab › **+ Log incident**, pick students (appendix B).
3. Feedback: pick the week, write in your skill's cell (up to 500 characters).

WHEN IT IS DONE

The incident shows on the student's Conduct tab; the form teacher gets a task. Your feedback shows in the cell.

FIX A MISTAKE

Open the incident › edit / delete (who logged it, the form teacher, the Head). Feedback: edit in the cell.

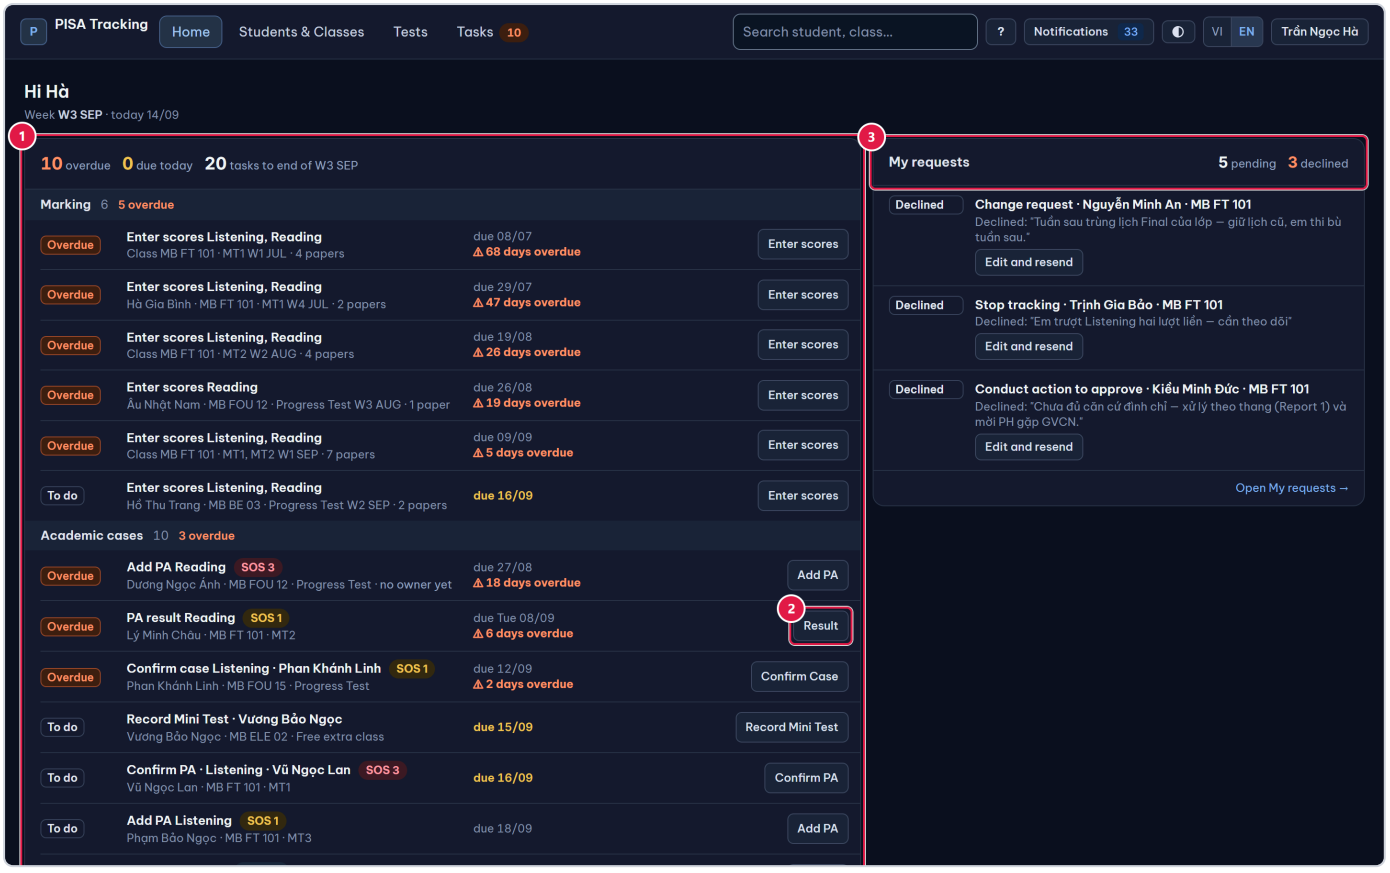

WHEN IT IS BLOCKED

A date in the future is not allowed. A student not in any class cannot get an incident.

Common mistakes	Fix
Several students + a second incident	Several students = one incident; log two incidents student by student.

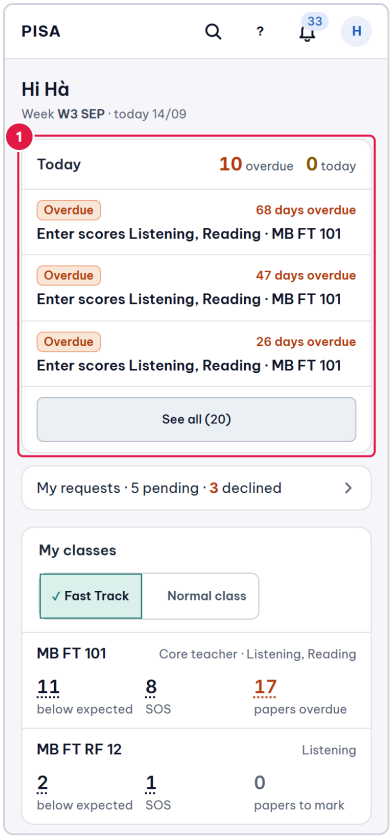

Screen by screen

Home

Home

1. Tasks until the end of the week, overdue first.
2. The button at the end of a row does the task.
3. My requests: pending / declined.

Home on a phone

1. Today: the nearest tasks.
2. Bottom bar: four areas.

Today

- Your tasks to the end of the week, overdue on top.
- Click a task to do it now; on a phone, **See all** opens Tasks.

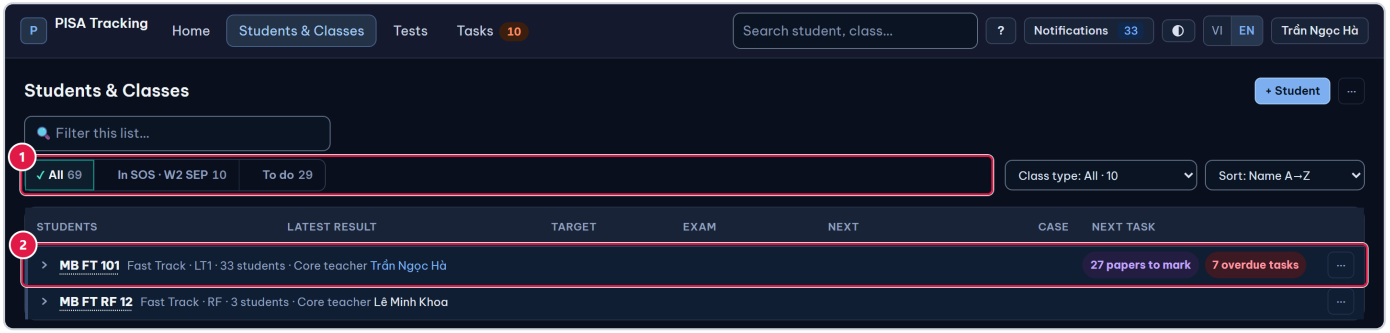

My classes

- The classes you teach and papers waiting to be marked.
- Click a class name to open its profile.

My requests

- Requests you sent to the manager (reschedule, change PA…) and their status.

Students & Classes

Students & Classes

1. Three views: All · In SOS · To do.
2. Click a student row for a side panel.

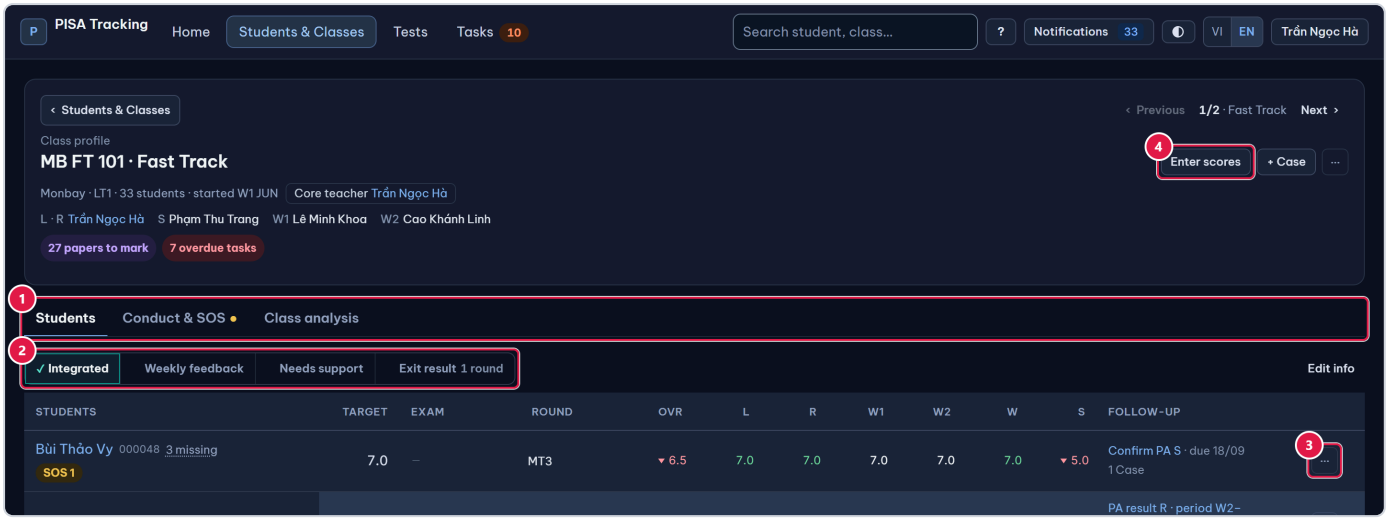

Find a student or class

- Type at least 2 letters in **Search student, class…** on the top bar.
- Typing "ft101" finds class MB FT 101.

Three views

- **All** · **In SOS** by test week · **To do**.
- Click a student row to open their panel without leaving the page.

Class profile

Class profile

1. Tabs: Students · Conduct & SOS · Class analysis.
2. View: Integrated · Weekly feedback · Needs support · Exit result.
3. ⋯ on a student row.
4. **Enter scores** for the class.

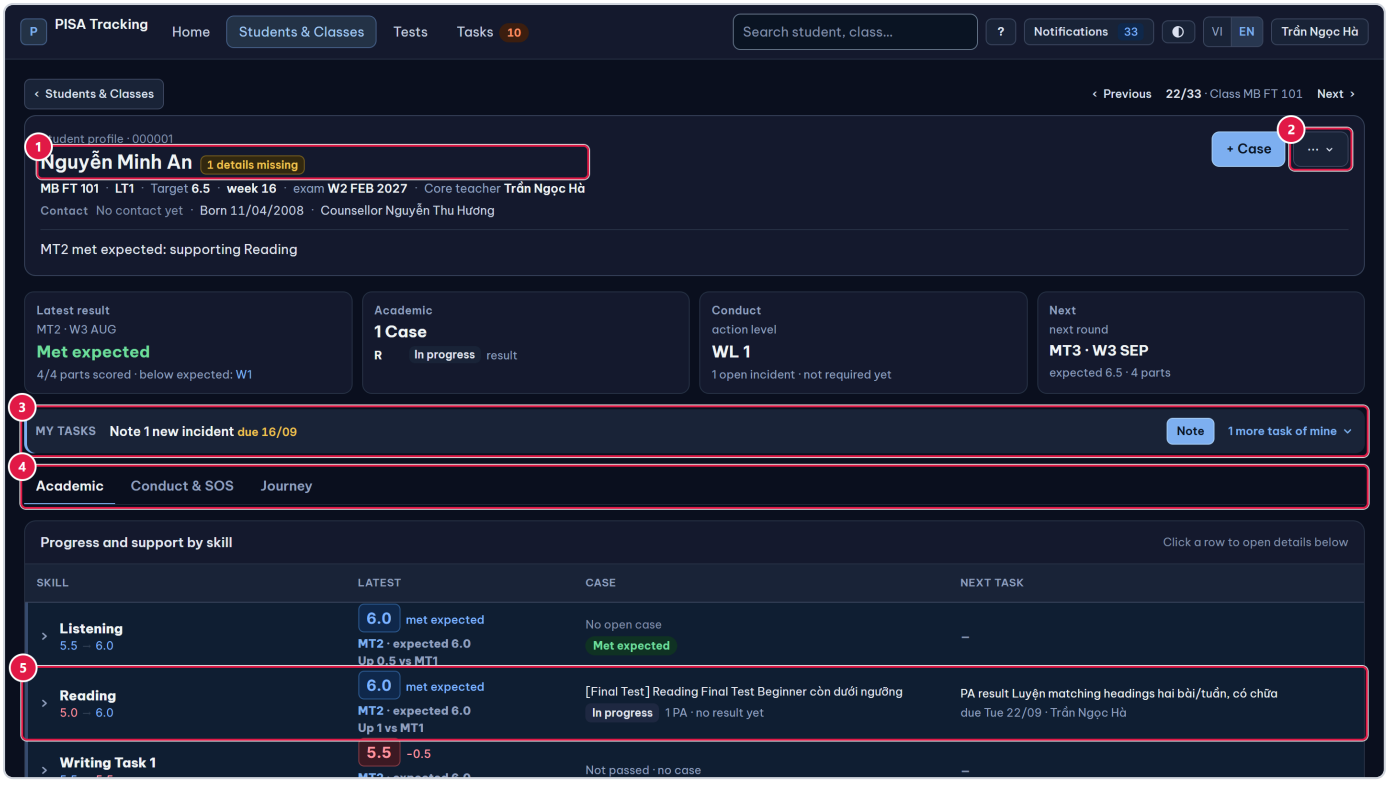

Students of the class

- The class student table; ⋯ on a row: + Log incident, + Case, Enter scores.
- Bottom of the page: **Class mock test scores** (normal class: **Class test scores**).

Weekly feedback

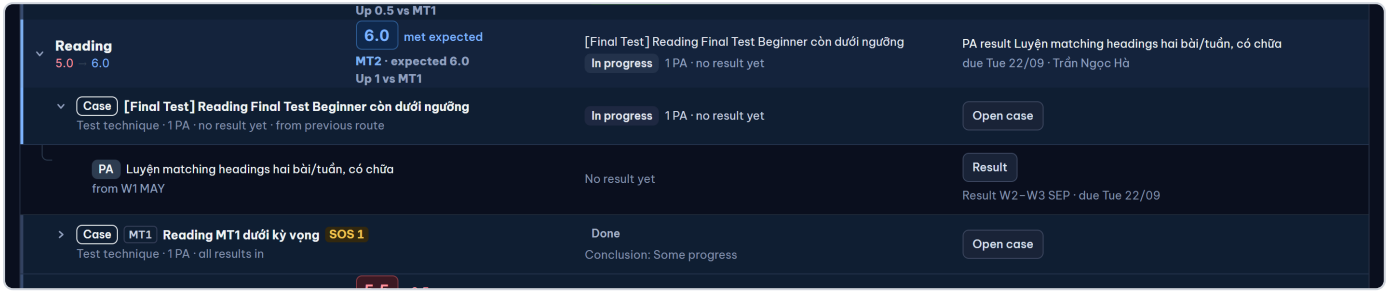

- **Students** tab › View **Weekly feedback**: rows = students, columns = skills, pick the week < >.
- You write / edit the boxes of the skills you teach.

Student profile

Student profile · Academic

1. Name and status chips.
2. ⋯: actions for this student.
3. My tasks for this student.
4. Tabs Academic · Conduct & SOS · Journey.
5. One skill: latest score, Case, next task.

The Case opens on the profile

Academic

- Skill board: four-colour score cells, the student's Cases and PAs.
- Click a Case to open the Case drawer on the same page.
- PA not yet due: **Update early** in the case drawer.

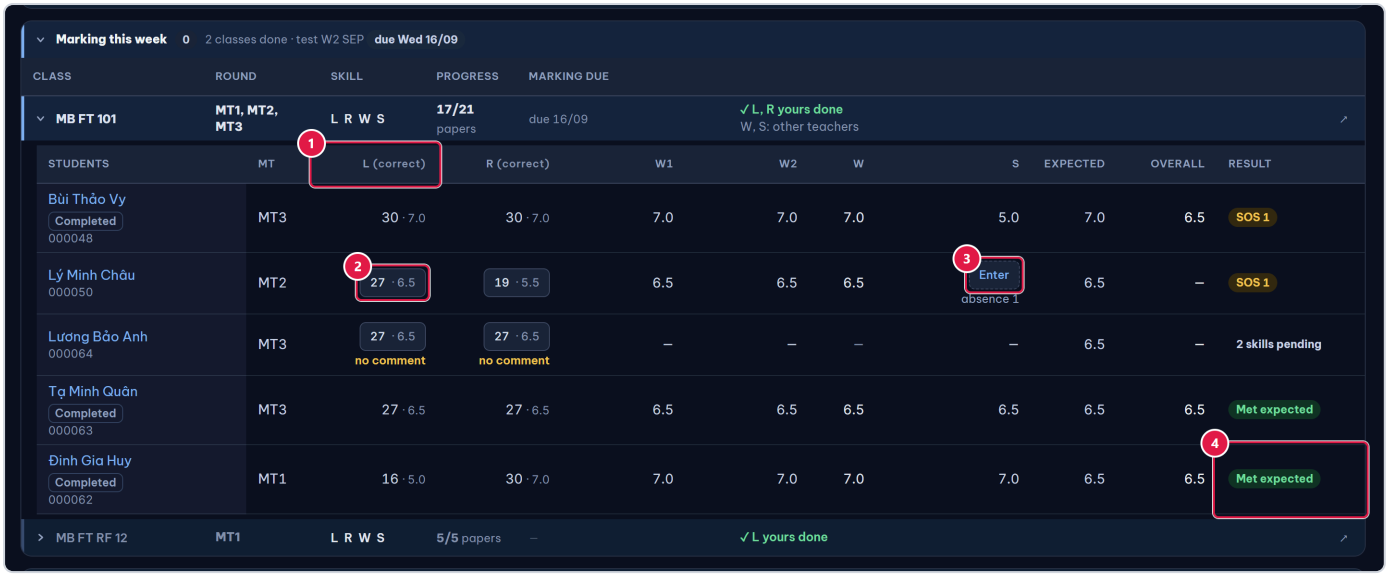

Conduct & SOS

- Incidents, actions taken and SOS coordination for the student.

Journey

- Every Test round of the student on one grid.

Test schedule

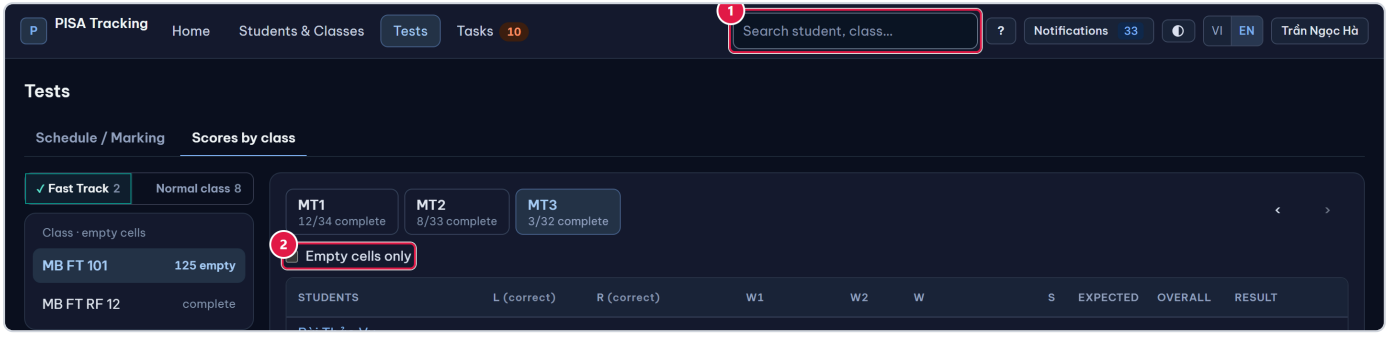

Score grid in the schedule

1. L column (correct answers).
2. A cell with a score.
3. An empty cell.
4. Result.

The three blocks of Test schedule

- **Overdue marking** · **Marking this week** (due Wednesday) · **Tests this week** (or **Tests in** the week shown).
- Click a class row; the score grid opens right below.

Scores by class

Scores by class

Score table for one round

- Pick a class, then a round (MT1, MT2…).
- **Empty cells only** to finish entering.

Enter scores

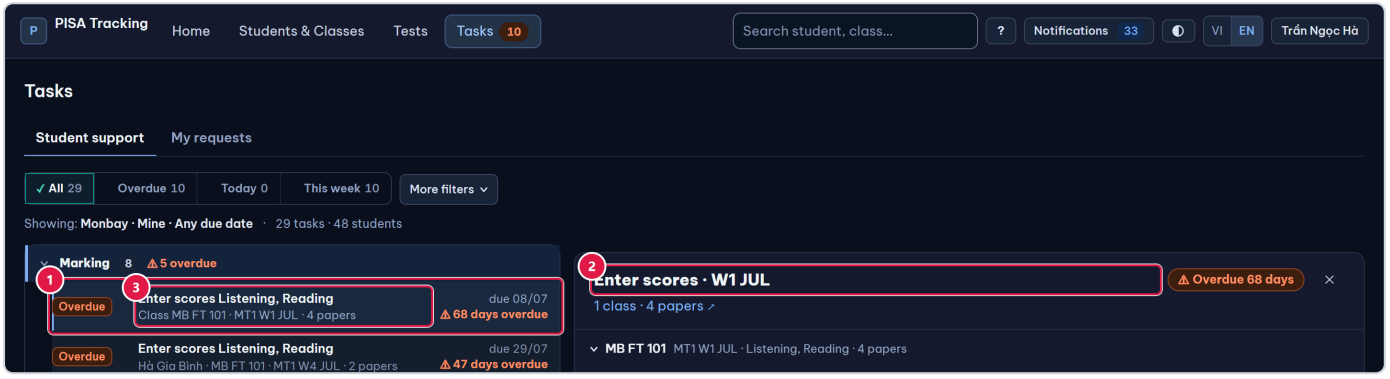

Entering scores on a phone

Typing scores

- Type a score, Enter moves down; each cell saves itself.
- Absent student: type **-**.
- MT cell with a score: write a **comment**; below expected also pick a **cause group**.

Tasks

Click a row: the panel opens on the right

1. The row you are working on.
2. The task panel.
3. The cell to fill in.

Work right on the row

- Click a row → the fields open right beside it.
- Saved on the row: "✓ Saved · … · Undo", then the next task opens; panel: **Next task ›**.

Speaking cross-marking

- **Marking** group: Speaking papers of other classes in your branch — last week plus any left over, grouped by test week → class.
- Shows papers waiting; never overdue.

Rows grouping several students

- An "n students" row opens the student list; do them one by one or together.

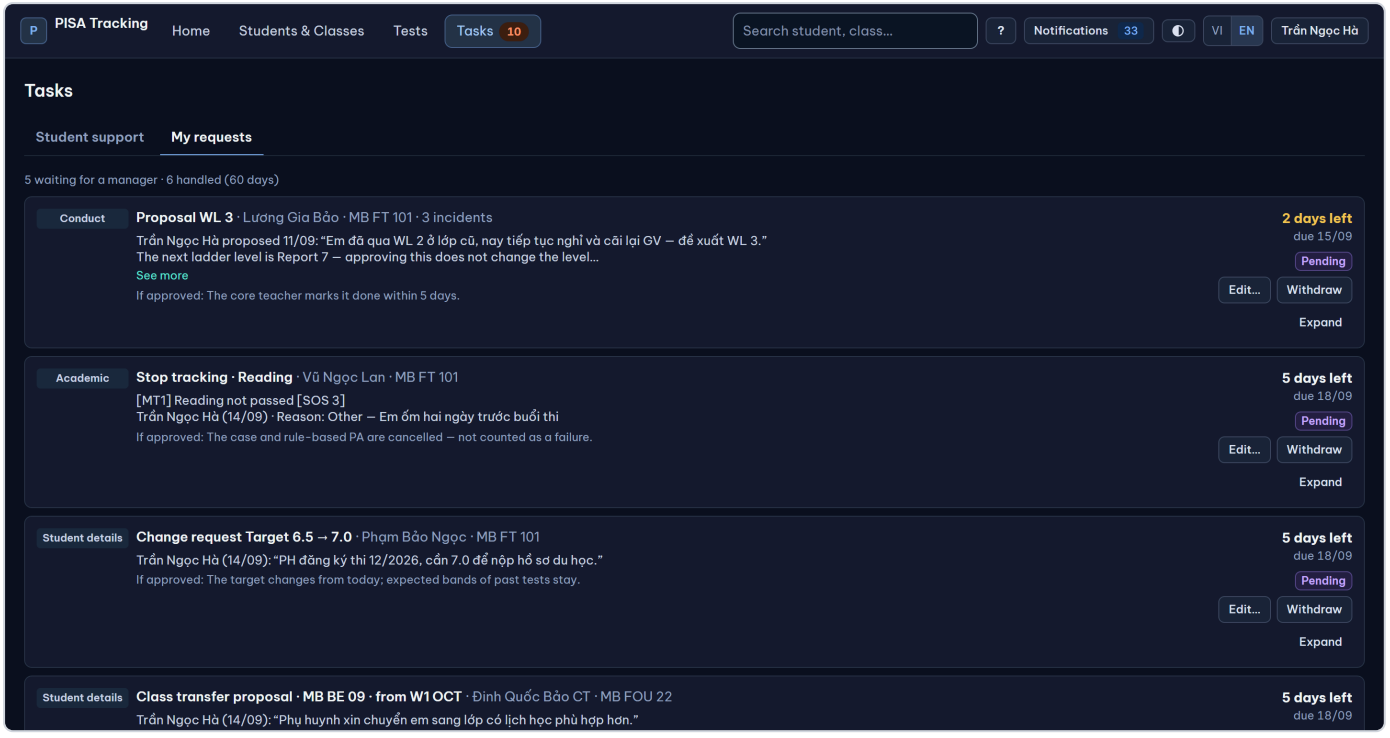

Why a task is overdue

- Past the deadline and not saved: orange **Overdue** chip + ⚠, at the top of the list.
- Once saved, it is no longer overdue anywhere.

Filtering tasks

- **Overdue · Today · This week · All** chips; **More filters** by task group and programme.

My requests

My requests

Tracking requests

- Requests you sent the manager: Pending · Approved · Declined (with reason).

My profile

Edit your profile

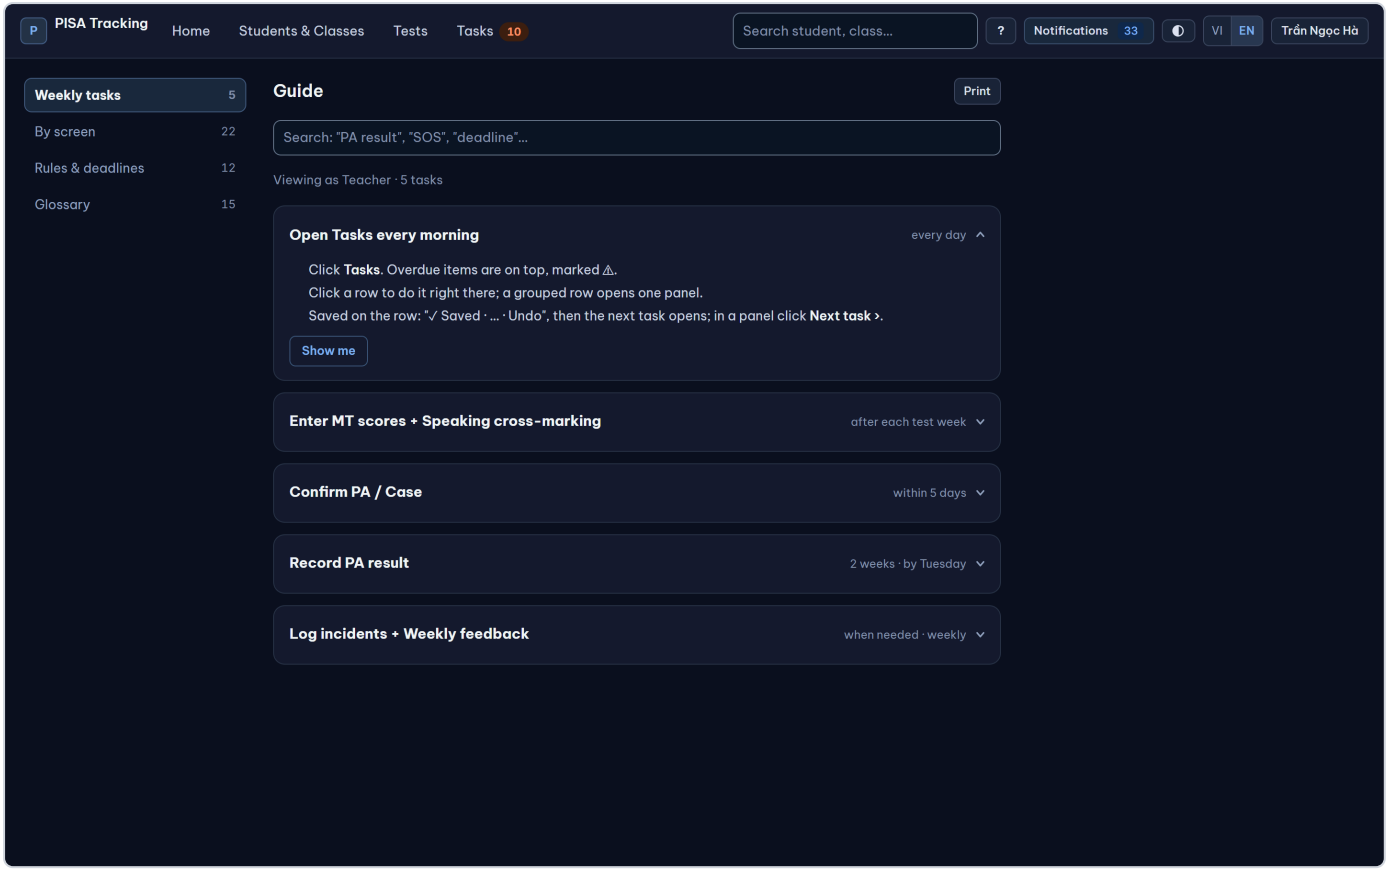

- Change your name, phone, password.
- Language: the **VI | EN** button on the top bar (phone: Account menu), remembered for your account.

Teacher profile

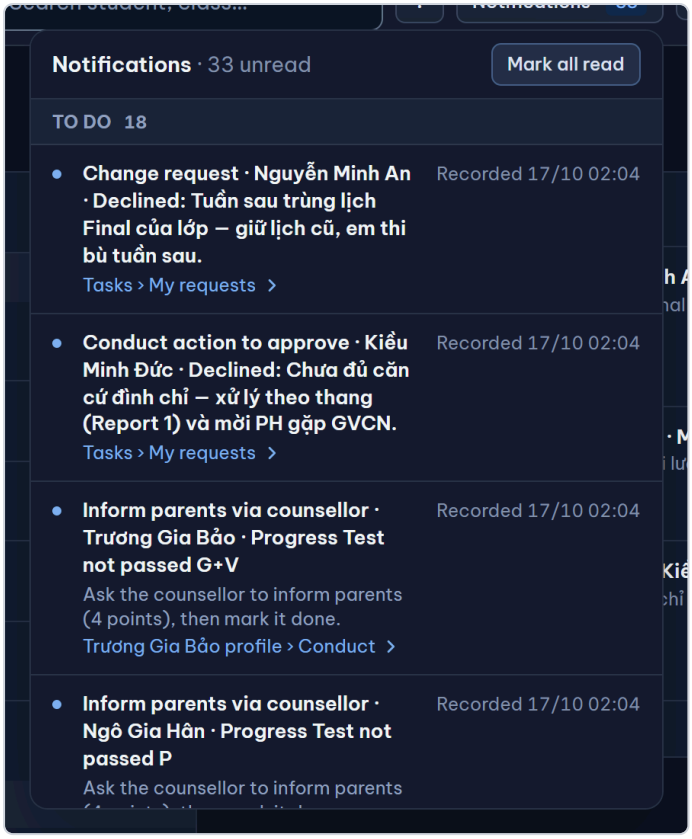

Your numbers

- Classes you teach, students, cases you own, overdue tasks; click a number to open Tasks.
- The **Latest results of your classes** block.
- The **Requests sent** block.

Guide

The Guide page in the app

Notifications: To do / FYI

Using the Guide

- The **?** button on every screen opens the section for that screen.
- **Show me** circles the button to click; Esc to close.
- **Print** for a paper copy.

Rules and deadlines

Deadline table

Task	Deadline	Who
Enter Mock Test scores (test week)	Wednesday of the next week	Teacher of that skill
MT0	Wednesday of the next week	Teacher of that skill
Speaking cross-marking	Never overdue (shows a count)	Speaking teachers in the branch
Comment + cause groups on MT scores	With the score (missing comment = task not done)	The marker
Confirm PA	5 days from the closed round (SOS 3 / Urgent: 3 days)	Subject teacher of that skill
PA result	Every 2 weeks, by Tuesday after the period	Teacher on the PA
Handle an incident	5 days from logging	Form teacher
Handover when a student moves class	Later of (decision + 7 days) and the old date	Old form teacher + each subject teacher
The Head answers your proposal	5 days, counting the day sent	Head

SPEAKING CROSS-MARKING

The cross-marker writes the comment; the class's lead Speaking teacher reads it and can add a separate **Lead teacher comment** and adjust the cause groups.

Mock Test marking deadline	• Papers of a test week: marked by end of **Wednesday** the next week. • MT0: by end of **Wednesday** the next week. • Speaking cross-marking is never overdue.
Confirm PA deadline	• **5 days** from the day the round is closed, counting that day. • SOS 3 / Urgent: **3 days**. • Normal class Progress Test: Confirm case within 5 days.
Record PA result deadline	• **2-week** periods; due **Tuesday** after the period. • Skill meets expected at the next MT → **Record final result**, then **Close case**. • No exam date yet → the milestone is the last MT of the pathway.
Incident handling deadline	• **5 days** from the day it is logged, counting that day. • Levels that need the manager are approved by the manager.
Manager replies to proposals	• The manager replies to PA proposals / help requests within **5 days**, counting the day sent.
The "-" mark (absent)	• During the test week: "-" = absent, closed at once. • Late entry / old MT: "-" = Did not sit. • Undo absent: delete the "-", any time.
SOS and Case	• Number of skills below expected on an MT: 1 → SOS 1, 2 → SOS 2, 3–4 → SOS 3. • Round not closed: provisional case "Awaiting SOS close" — no deadline, no task yet. • Round closed → "Awaiting PA confirmation"; Overall meets expected before the PA is confirmed → the case is removed.
End a PA early	• Rule-based PA: the core teacher / manager uses ··· > **End PA**. • A reason of at least **10** characters is required; the PA log keeps it.
Handover when a student changes class	• Handover deadline = the later of (class-change decision date + 7 days) and the earlier deadline.
Changing scores after completion	• Empty cells can still be filled after completion. • Changing / deleting an existing score: ask the manager to do it. • A "-" can be removed any time.
MT comment	• Every MT cell with a score needs a comment of at least **10** characters (except MT0, old MT / late entry). • A cell below expected also needs a **cause group**. • The comment + group are the cause recorded on the Case.
Weekly feedback	• Each box = one student × one skill × one week; up to **500** characters. • Write only in the skills you teach.

Who can do what

Task	Subject teacher	Form teacher	Head
Enter scores for your skill	✓	✓	✓
Enter empty cells after a round is complete	✓	✓	✓
Change / delete a score after completion	–	old MT only	✓
Confirm PA	✓ own skill	–	✓
Record a PA result	Teacher on the PA	Teacher on the PA	✓
Log an incident	✓	✓	✓
Handle incidents (conduct ladder)	–	✓	✓
Weekly feedback	Own skill	Own skill	–

FAQ

I entered the scores but the task is still overdue?
Each MT score needs a 10+ character comment; below expectation also needs a cause group. Open the grid and look for "missing comment".

What do I type for an absent student?
A "-". In the test week it means absent; for late entry / old MTs it means did not sit. Delete the "-" to remove it, any time.

The round is complete and I need to change a score?
Empty cells can still be entered. To change or delete an existing score, ask the Head.

What is a provisional Case?
The MT round is not closed yet: SOS and the Case are only provisional — no deadline, no task, not counted. They become real when the round is closed.

Can I paste scores from Excel?
No. The grid takes one cell at a time.

Some text is still in Vietnamese?
Names, comments and notes typed by people stay as written. Buttons and labels are in English.

Glossary

Glossary	
MT (mock test)	Four-skill L R W S Mock Test of Fast Track classes; MT0 is the entry baseline.
Normal class (not FT)	Pre FOU, FOU, BE, ELE — sit a Progress Test and a Final Test, counted by subject.
Expected	The band the student should reach at each MT on the pathway.
SOS levels 1 · 2 · 3	By number of skills below expected: 1, 2, or 3–4.
Case (issue record)	Record of one academic issue of a student: cause, PA, results.
Provisional case / provisional SOS	MT round not finalised: SOS and Case are provisional ("Awaiting SOS finalisation") — no deadline, no task, not counted; they become real once the round is finalised.
KCK (no commitment)	No Target commitment: no MT expectations, no automatic SOS; MT schedule, score entry, manual cases and Conduct still apply.
PA (support plan)	How the student is supported: Self-study, Extra class, Tutoring…
Rule-based PA	Default PA for the SOS level, running until the rule-based milestone.
Extra-class PA	Normal class PA after the Progress Test, running until the end of the course.
Tutor (one-to-one)	One-to-one tutoring PA; record each session.
Core teacher · Subject teacher	Teacher in charge of the class · teacher of one skill.
Speaking cross-marking	Teachers of the same branch mark Speaking for another class.
Week code	**W2 OCT** = the 2nd week of October; a week belongs to the month of its Thursday.
QL (Manager)	Branch manager — approves Cases, PAs, proposals, Test schedules.

Appendix · Many at once

A. Confirm PA for several students

Who: the subject teacher of that skill (a Head can do it too). **Where:** Tasks, a grouped row "n students" (same class, same test week, same SOS level).

- Students are ticked already; untick anyone you want to leave. Write the content (15+ characters), the start date (today by default; up to 7 days back) and the teacher once for the whole group.
- Need something different for one student? Use the per-student edit — it wins over the shared values.
- Each PA is saved on its own: done students fold into "✓ Confirmed n students"; a failed student moves to the top with "⚠ reason" and stays ticked so you can try again.
- After confirming: change a PA from the Case, or send a different PA to the Head for approval.

B. Log an incident for several students

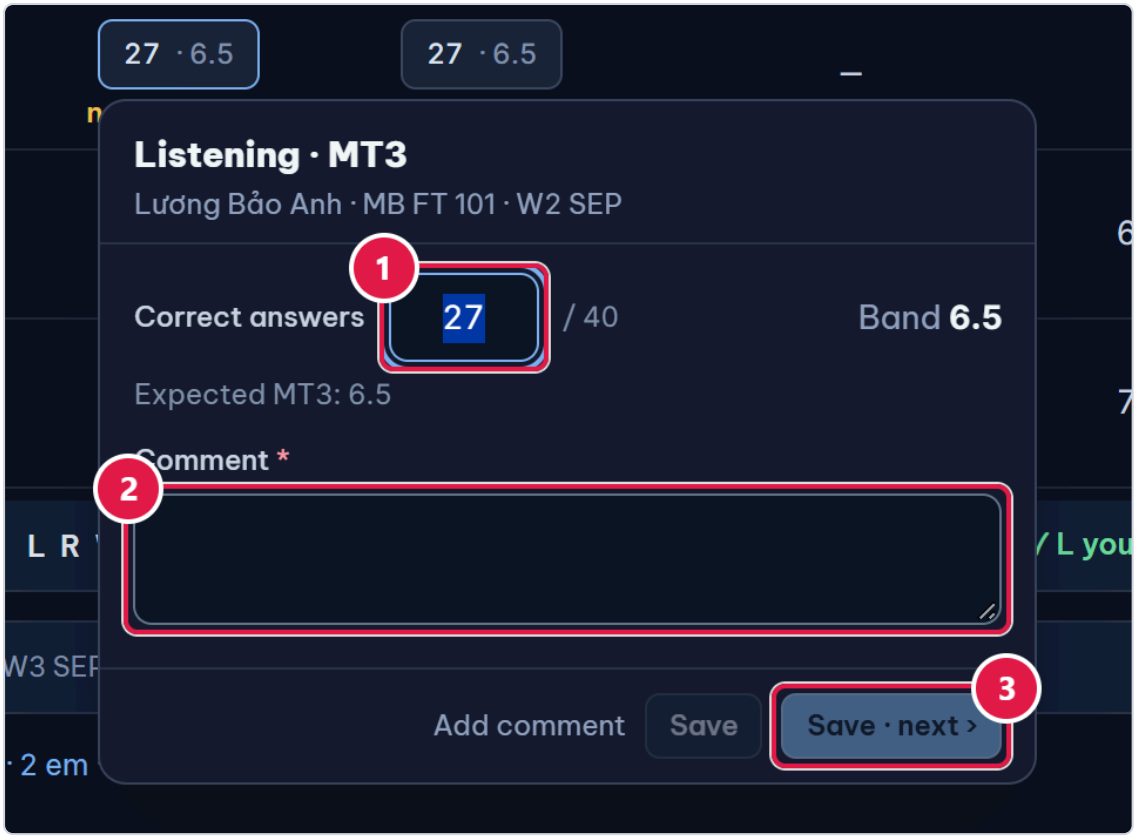

Who: any teacher of the class, the form teacher, the Head. **Where:** class profile › Conduct tab, or a student row › ⋯.

- Two ways: **many students, one incident** (up to 60) — or **one student, up to 10 incidents**. You cannot mix them.
- Required: date (not in the future), group, incident (3–60 characters). Description and evidence are optional.
- Saved student by student: one failure does not undo the others; the panel shows who is not saved yet and a retry button.
- Logged by mistake: open the incident › edit or delete (the person who logged it, the form teacher, the Head).

C. Score grid: no pasting from Excel

ONE CELL AT A TIME

The score grid **does not accept a pasted block of cells**. Type each score; Enter or Save · next › moves to the next student in the same column.

Listening score box (Fast Track)

1. Correct answers out of 40 (whole number) — the band is worked out. To type a band, use a dot (6.5) or b6.
2. Comment: required for every MT score (10+ characters).
3. Save and go to the next student.

Cell	Type	Note
Listening, Reading	Correct answers 0–40, or a band 0–9 in steps of 0.5 with a dot (6.5) / "b6"	**Use a dot**: 6,5 is rejected.
Writing 1, 2, Speaking	Four criteria, each 0–9 in steps of 0.5 — the band is worked out	A typed band is only for old MTs and MT0.
"-"	The student did not sit the test (not 0)	In the test week: absent. Late entry / old MT: did not sit. Delete the "-" to remove the absence, any time.
Clear a cell that has a score	= delete the score	Reason is optional.

AFTER A ROUND IS COMPLETE

Empty cells: the teacher of that skill can still enter them. To change or delete an existing score, ask the Head.
